In the Mirror of Persian Kings: the origins of Perso-Islamic courts and empires in India.

9781108832311 250p Cambridge 2021 Cambridge U.P. 16,875

: Blain Auer demonstrates how Persian kingship was a transcultural phenomenon. Describing the contributions made by kings, poets, historians, political and moral philosophers, he reveals how and why the image of the Persian king played such a prominent role in the political history of Islamicate societies, in general, and in India, in particular. By tracing the historical thread of this influence from Samanid, Ghaznavid, and Ghurid empires, Auer demonstrates how that legacy had an impact on the establishment of Delhi as a capital of Muslim rulers who made claims to a broad symbolic and ideological inheritance from the Persian kings of legend.

Sarasvati. 9788194815877 Delhi 2021 Motilal
3,400

: Madhusudana Sarasvati (1540-1647), was one of the greatest exponents of Advaitism in the Post-Sankara era. He made valuable contribution to the knowledge of Advaitism with his works like Siddhantabindu, Advaitasiddhi, and Vedāntakalpalatikā etc. The most famous among them is Advaitasiddhi, in which he has upheld the Advaita and forcefully refuted the criticism by Sri Vyasa-tīrtha in his work Nyamr̥ta. He flourished during the period when the Bhakti movement is gaining widespread popularity throughout the country which influenced scholars as well as laymen. The Interreligious rivalry and wrangles were at peak. He was an ardent devotee of Śrī Kṛṣṇa since his childhood and continued the worship of his Ista, even after resorting to Sannyāsa. He wrote an exclusive treatise on Bhakti to Śrī Kṛṣṇa called Bhakti-Rasayana, based on Bhagavatapurāṇa, in which he asserted that Bhakti is an independent path for liberation. Bhakti is the highest goal of life, and it is not a mere path but an end itself and Kṛṣṇa is none else than Parabrahman.

: The city of Varanasi in North India is one of the most sacred Hindu places. Its unique location on the banks of the Ganga adds to its special claims of holiness. These claims found expression in an extensive body of literature called Mahatmyas, texts, composed in Sanskrit

with the specific aim of promoting the greatness (mahatmya) of the town through the narration of tales of origin of individual sites. The present study presents a little-known Varanasimahatmya which has survived in a unique compendium of such Mahatmyas in a palm-leaf manuscript in Nepal.

The Greek God Helios & the Indian Deity Sūrya: a study in the dissemination of Sun God imagery.

9788194829416 vi,110p 110 color Parganas 2021
Salti Halder 4,806

: This book examines, in the light of numerous iconographies, the syncretism of three deities associated with the sun, the Indian Surya, the Greek Helios, and the Iranian Mithra. The Gandharan statue of the Bodhisattva Siddhartha in the Royal Ontario Museum in Toronto, wearing a headdress depicting the sun god in the guise of a Bodhisattva, performing the adhayamudra (ithe gesture of fearlessness) standing frontally in a chariot drawn by four horses, was the starting point for this study. This syncretic image of the Greek Helios and the Indian Surya with Buddhist overtones is a direct result of the cross-cultural nature of Gandharan Art.

Daksina Kosala: a rich centre of early Śaivism. 9789492444677 338p Groningen 2018 Barkhuis 17,010

: This book deals with the early development of Śaivism in ancient Dakṣiṇa Kosala, the region that roughly corresponds to the modern state of Chhattisgarh, plus the districts of Sambalpur, Balangir and Kalahandi of Odhisha (formerly Orissa). At the end of the sixth and the beginning of the seventh century, this region was under the control of the Pāṇḍava king Śivagupta alias 'Bālārjuna' hailing from Śrīpura (the modern village of Sirpur), who was a great patron of religion. Epigraphical evidence, supported by archaeological remains, has shown that by the time of Śivagupta's reign, which lasted for at least fifty-seven years, Dakṣiṇa Kosala was already a rich centre of early Śaivism.

Greater Magadha: studies in the cultures of early India. 9788120835344 xix,414p Delhi 2013(07)
Motilal 3,180

: *Greater Magadha, roughly the eastern part of the Gangetic plain of northern India, has so far been looked upon as deeply indebted to Brahmanical culture. Religions such as Buddhism and Jainism are thought of as derived, in one way or another, from Vedic religion. This belief is defective in various respects. The book argues for the importance and independence of Greater Magadha as a cultural area until a date close to the beginning of the Common Era. In order to correct the incorrect notions, two types of questions are dealt with: questions pertaining to cultural and religious dependencies, and questions relating to chronology. As a result a modified picture arises that also has a bearing on the further development of Indian culture.*

Combining close textual analysis with wider theoretical concerns, Cox traces this philological transformation in the works of the dramaturgist Śārādātanaya, the celebrated Vaiṣṇava poet theologian Veṅkaṭanātha, and the maverick Śaiva mystic Maheśvarānanda.*

A Prehistory of Hinduism. 9783110517361

xii,221p Berlin 2016 de Gruyter 7,938

: *(Open access)*

This book is a pioneering attempt to understand the prehistory of Hinduism in South Asia. Exploring religious processes in the Deccan region between the eleventh and the nineteenth century with class relations as its point of focus, it throws new light on the making of religious communities, monastic institutions, legends, lineages, and the ethics that governed them. In the light of this prehistory, a compelling framework is suggested for a revision of existing perspectives on the making of Hinduism in the nineteenth and the twentieth century.

Hindu Pluralism: religion and public sphere in early modern South Asia. (South Asia across the disciplines)
9789386552860 296p Delhi 2018 Primus Books

: *Fisher's work excavates the pluralistic textures of precolonial Hinduism in the centuries prior to British intervention. Drawing on previously unpublished sources in Sanskrit, Tamil, and Telugu, Fisher argues that the performance of plural religious identities in public space in Indian early modernity paved the way for the emergence of a distinctively non-Western form of religious pluralism. This work provides a critical resource for understanding how Hinduism developed in the early modern period, a crucial era that set the tenor for religion's role in public life in India through the present day.*

: *Gommans skilfully weaves together the histories of the environment, horse trade, military service, and migration to explain the final – but no less remarkable – instance of Afghan state-formation on the Indian subcontinent. The eighteenth century witnessed the emergence of two types of Indo-Afghan polities. The first was the rise of the Durrani Empire, founded by Ahmad Shah in 1747, which expanded into north India and Iran. The second were those states created in the mid-eighteenth century by free Afghan horse dealers and mercenaries, such as Rohilkhand and Farrukhabad.*

Did he take initiation from Vallabha? No. Who was he, then? Proceeding theme by theme, Hawley paints a very different portrait.

In some cases, these new ideas transformed states and empires alike. Particularly in Europe, these transformations are well-chronicled in scholarship. In academic writings on India, however, Muslim political and legal thought has gone relatively unnoticed during this eventful decade. This book fills this gap by mapping the evolution of Muslim political and legal thought from roughly 1927 to 1940.*

Revenue System in Post-Maurya and Gupta Times.

9789390035229 321p New Delhi 2020

Manohar 3,980

: This is arguably the first systematic study of the revenue system in Post-Maurya and Gupta times. The author shows that some new principles of taxation were enunciated during the period under review. In earlier times the king was entitled to taxes in lieu of protection afforded to the people, but in the Gupta period royal ownership came to be considered as basis of taxation. The volume discusses the earliest epigraphic evidence regard-ing fiscal concessions granted to priests and temples.

: Sultans -- Gujarat -- India -- History -- 1526-1765.

*In Praise of Kings is a ground breaking study of the long-
neglected fifteenth century in South Asian history.
Contrary to the conventional focus on the Delhi-centred
empires which consider this period as an age of decline,
this book illuminates the cultural and political dynamism
of the era. It reconstructs the fascinating world of the
royal courts of Gujarat, including those of the Rajput
chieftains and the regional sultans, through close
readings of rarely used literary works in Sanskrit and
Gujarati. The book also complicates another popularly
held perception: that of Gujarat as the land of traders
and merchants. Instead, it shows how Gujarat's warrior
past was also integral to this region's identity and
history.*

: *Ellora attempts the first systematic overview of the Ellora cave temples, a UNESCO World Heritage Site. The origin of rock-cut architecture in India may be traced to the indigenous tradition of using natural caverns by ascetics and mendicants. The earliest rock-cut excavations were patronised by the Mauryan Emperor Ashoka in the Barabar and Nagarjuni Hills around 250 BCE. Between 200 BCE to 200 CE Buddhist chaityas and viharas were excavated along ancient trade routes. In tracing the evolution of rock-cut temples, the Ellora cave temple site is the only site that houses Buddhist, Brahmanical and Jain caves. These rock-cut cave temples were excavated between 600 -1000 CE.*

between the Mahābhārata and the Harivaṃśa, between the epics, their khilas and the purāṇas, and between different stages of the purāṇic tradition. The contributions are written by prominent scholars working on Vedic, Sanskrit epic and purāṇic projects, and display a select, but representative, image of the state of the art, of important new results and of challenging open questions, in these crucial fields of Sanskrit scholarship.

: *From a single merchant's list of baggage begins a history that explores the dynamic world of medieval Indian Ocean exchanges. This fresh and innovative perspective on Jewish merchant activity shows how this list was a component of broader trade connections that developed between the Islamic Mediterranean and South Asia in the Middle Ages. Drawing on a close reading of this unique twelfth-century document, found in the Cairo Genizah and written in India by North African merchant Abraham Ben Yiju, Lambourn focuses on the domestic material culture and foods that structured the daily life of such India traders, on land and at sea.*

: *What happened in Mughal India in the quarter century after Akbar's death? Nothing that really mattered – according to received wisdom. Through a complete re-examination of the reign of the fourth Mughal emperor Jahangir, this book upends that traditional view.*

Rather than provide a linear history of this relatively neglected monarch, Lefèvre analyses a wide range of imperial and non-imperial texts, as well as vestiges of material culture, to reveal major transformations involving imperial authority, ethno-religious diversity, and state centralism.

Following an overview of Biruni's chief interests, it details his major works to illustrate the breadth of Biruni's output and his intellectual approach, especially his attention to language, esteem for knowledge, and commitment to objective truth. An account of his institutional context and relationships elucidates his friendships and rivalries, notably with Avicenna. The book also shows how varied paths of transmission affected the legacy of Biruni and its reception in global scientific and literary traditions. Finally, a timeline, list of key works, and detailed bibliographic essay will guide readers into further study of Biruni and his thought.

Supra-regional institutions and networks of many other kinds - sect-based religious maths, pilgrimage centres and their guardians, sants and sufi orders - flourished, offering greater mobility to wider communities of the pious.*

: *Part One provides a concise overview of the literary genres in which Dharmasastra was written with attention to chronology and historical developments. This study divides the tradition into its two major historical periods—the origins and formation of the classical texts and the later genres of commentary and digest—in order to provide a thorough, but manageable overview of the textual bases of the tradition. Part Two presents descriptive and historical studies of all the major substantive topics of Dharmasastra. Each chapter offers readers with salest knowledge of the debates, transformations, and fluctuating importance of each topic. Indirectly, readers will also gain insight into the ethos or worldview of religious law in Hinduism, enabling them to get a feel for how dharma authors thought and why. Part Three contains brief studies of the impact and reception of Dharmasastra in other South Asian cultural and textual traditions. Finally, Part Four draws inspiration from critical terms in contemporary legal and religious studies to analyze Dharmasastra texts.*

: The 'long' fifteenth century in South Asia is persistently seen as a dark age of fragmentation and decline that ended only with the arrival of the Mughals. This volume looks beyond such assumptions and demonstrates the period to be one of intense cultural production, religious exchange, and political innovations, many of which prefigured later Mughal developments and proved foundational for subsequent South Asian culture.

Since Varamihira. It examines in detail almost all available evidences and attempts to set right the arising disputes. Refuting convincingly, the assertions of H.T. Colebrooke (1872) and Swami Satya Prakash Saraswati that Aryabhat was the founder of Algebra in India, the book presents a systematic account of algebraic equations, permutations and combinations from many centuries prior to Aryabhat and highlights the role of Varamihira and his school up to the time of Bhaskaracarya.

: *Rasas -- Aesthetics, Indic -- Sanskrit literature -- Early works to 1800*
From the early years of the Common Era to 1700, Indian intellectuals explored with unparalleled subtlety the place of emotion in art. Their investigations led to the deconstruction of art's formal structures and broader inquiries into the pleasure of tragic tales. Rasa, or taste, was the word they chose to describe art's aesthetics, and their passionate effort to pin down these phenomena became its own remarkable act of creation. This book is the first in any language to follow the evolution of rasa from its origins in dramaturgical thought'a concept for the stage'to its flourishing in literary thought'a concept for the page.

However, the medieval and early modern antecedents of this produce are far less clear, and so the purpose of this collection of essays is to explore the pre-modern history of cotton. To explore the nature of this history, and the importance of the Indian subcontinent, whose cotton goods traversed the world and which lay at the centre of a vast worldwide trading system, requires a global perspective, which the essays in this volume provide, ranging from China and Japan, to Europe, the Ottoman Empire, South-East Asia, and East and West Africa.*

: *In comparison with the "three canonical Vedas" which have many ritual works, Atharvaveda Śaunaka has only two sūtras, the Kauśikasūtra and the Vaitānasūtra, and a small number of texts of a commentary type. The Samskāraprayogaratna, here edited and translated for the first time, represents an effort of referring to a superior ritual tradition, in the ever quest of the Atharvavedins of creating their own tradition and of making it accepted. In the introduction, passages of the respective rites from the Kauśikasūtra, Dārila and Keśava and the two unpublished paddhatis (Ātharvaṇīya Paddhati and Daśakarmāṇi) are translated, most of them for the first time.*

Meanwhile, history writing on ancient India continues to be burdened by an Indological discourse, which takes 'India' as a monolithic whole and interprets sources in ways that contribute to a pan-Indian meta-narrative. Sources which are fragmentary in nature, or located far from the so-called centres of civilisation, are relegated to the footnotes and margins, merely as tools of corroboration.*

: *India -- History -- Sources -- Congresses*
The book explores the multiplicity of sources that can be used for studying Indian history. Texts, literature, inscriptions, and other sources have long been but the fountainheads of history. The contributors to this volume, however, begin with the premise that such sources, in the true spirit of historical research, need to be re-interrogated. Without ignoring questions of the validity of a source, they also emphasize the hybridity and range of material that can be used as a historical source.

Connected History considers what, exactly, is an empire, the rise of 'the West' (less of a place than an idea or ideology, he insists), Churchill and the Great Man theory of history, the reception of world literature and the itinerary of subaltern studies, in addition to personal recollections of life and work in Delhi, Paris and Lisbon, and concluding remarks on the practice of early-modern history and the framing of historical enquiry.

: *In the title essay of this enthralling collection, Sanjay Subrahmanyam sets a provocative ball rolling: 'At the heart of the matter', he says, 'is the notion that at some distant point in the past, say about AD 500, the concept of "Indian civilization" had already been perfected. Everything of any importance was in place: social structure, philosophy, the major literary works ... The central idea here is of India-as-civilization, and it very soon becomes the same as a notion of closed India.'*

Demolishing some of the myths which sustain the notion of 'the wonder that was India', he shows us a region that was always more a crossroads, a rendezvous for concepts, cultures, and worldviews.

For over five hundred years, Muslim dynasties ruled parts of northern and central India, starting with the Ghurids in the 1190s through the fracturing of the Mughal Empire in the early eighteenth century. Scholars have long drawn upon works written in Persian and Arabic about this epoch, yet they have neglected the many histories that India's learned elite wrote about Indo-Muslim rule in Sanskrit. These works span the Delhi Sultanate and Mughal Empire and discuss Muslim-led kingdoms in the Deccan and even as far south as Tamil Nadu. They constitute a major archive for understanding significant cultural and political changes that shaped early modern India and the views of those who lived through this crucial period.

: *Vipassanā-meditation (or practice) has become popular in South East Asia and the West. However, these practices aiming at reaching insight are taught in many varieties. The focus of this book is on the doctrinal sources of a number of vipassanā-practices.*

Part one considers a number of methods by modern teachers and scholar-monks about vipassanā-meditation, and compares these with the canonical Pali discourses they refer to. In Part two the author analyses which principles related to insight and practices to develop insight have been widely accepted in the Pali discourses. Furthermore, a comparison with some discourses available in English from Chinese versions is offered.

: *Nahezu alles, was wir heute über König Harsa wissen, erfahren wir aus der Rājataranginī („Wellenstrom der Könige“), einem historiographischen Werk sanskritischer Dichtkunst des kaschmirischen Dichters Kalhana. Dessen Vater war einer der Minister König Harsas und vermutlich sind es seine Berichte, die die Grundlage für die Rājataranginī bilden und die tiefen Einblicke in das höfische Leben jener Zeit ermöglicht haben.*

A Time of Novelty: logic, emotion, and intellectual life in early modern India, 1500-1700 C.E.

9780197568163 xxi,278p N.Y. 2021 Oxford U.P. 14,400

: *Samuel Wright re-envision the relationship between philosophy and history in premodern India. This relationship is studied through the tradition of Sanskrit logic between 1500 and 1700 CE — the period in Indian history that witnessed the ascendancy of the Mughal Empire. During this period, Sanskrit logicians would refer to themselves and their arguments as 'new,' indicating that the concept of novelty was at the center of their philosophical project. By retaining space for emotion when studying intellectual thought, this book recovers both what it means to "think" novelty and to "feel"*

novelty for these thinkers.
