He traces the work of generation of reformers; engineers of a new social structure, as well as events that shaped the modernisation path. These articles especially deal with the period since the 1908 revolution, examining the process by which the new Turkey was formed. :Provincial elites were an important factor in the life of the Ottoman Empire in many respects: as local leadership, as political figures mediating between the central state and its provinces, as tax-farmers and entrepreneurs, as role models for their peers. There is a wide variety of people who may be regarded as belonging to the Ottoman provincial elites, because of both the extensive territory occupied by the Empire and its longevity.

:Ottoman Crete has in recent years attracted historians' attention for a number of reasons, among which two particularities related to broader themes in Ottoman history stand out: the institution of private landownership in 1670 in breach of the age-long tradition of the miri ('state') land system, and the emergence of a large Muslim population, mainly through the conversion of locals to Islam.

:The study of clothes and dressing has great
potential for social and cultural history. Typically
Ottoman urbanites situated their fellow men after a
glance at the clothing worn by the latter. As to the
women, such conclusions were more difficult to draw,
as all females were to be modestly covered up and
ideally almost invisible. Yet in practice, at least from
the eighteenth century onwards, it was often
possible, at least in Istanbul, to distinguish
fashionable from soberly pious women. To be aware
of people's modes of dressing thus was part of
knowing one's way around in Ottoman society.

:Great-Power conflict between the Ottomans and
the Safavids dominated the fate of the Middle East
and to a lesser but still sizeable degree of the
Caucasus throughout the 16th century. The Ottomans
under Qanuni Sultan Suleyman conducted several
campaigns against the Safavid neighbor with the
ultimate aim to adding parts of Iran to their realm.
There was a clear hope on the Ottoman side that
they could exploit inter-tribal rivalry among the
Kizilbas and the ambitions of Safavid princes for their
aims.
