Were there political initiatives 'from the bottom up' in an empire where the sultan ruled over his 'flock' (reaya) rather than governing citizens with formal civil and political rights in the modern sense of these terms?

2879 Anastasopoulos, Antonis (ed.)

Provincial Elites in the Ottoman Empire: Halcyon Days in Crete V.A. Symposium held in Rethymno, 10-12 Jan. 2003. (Halcyon Days in Crete V) xxviii,367p Rethymno 2005 9789605242169 6,125

Provincial elites were an important factor in the life of the Ottoman Empire in many respects: as local leadership, as political figures mediating between the central state and its provinces, as tax-farmers and entrepreneurs, as role models for their peers. There is a wide variety of people who may be regarded as belonging to the Ottoman provincial elites, because of both the extensive territory occupied by the Empire and its longevity.

During the early Ottoman period (1300-1453),
scholars in the empire carefully kept their distance from
the ruling class. This changed with the capture of
Constantinople. From 1453 onwards, the Ottoman
government co-opted large groups of scholars, usually
over a thousand at a time, and employed them in a
hierarchical bureaucracy to fulfill educational, legal and
administrative tasks.

Linguistic Minorities in Turkey and Turkey-speaking Minorities of the Peripheries. (Turcologica, 111)

400p Wiesbaden 2017 9783447107235 15,400

Language plays an important role for the identity building of nation states and smaller linguistic communities. The authors of this volume present different aspects of the mutual influences between linguistic identity, political dominance, religious denomination, and the social, political, and historical frameworks in which language choice or maintenance take place. Another major issue is the expression of a specific culture as reflected in literature and religious texts. Examples presented include Anatolia and the peripheries of Turkey, such as the Balkans, Greece, the Caucasus, the northern Black Sea region, Cyprus, and Iraq.

Faroqhi shows that even those craftsmen who did not travel extensively had some level of mobility and that the Ottoman sultans and viziers, who spent so much effort in attempting to control the movements of their subjects, could do so only within often very narrow limits.

The Proper Order of Things: language, power, and law in Ottoman administrative discourses. xii,426p Stanford 2018 9781503603561 10,570
As Ottoman territory grew, so too did its network of written texts: a web of sultanic edicts, aimed at defining and supplementing imperial authority in the empire's disparate provinces. With this book, H.L. Ferguson studies how this textual empire created a unique vision of Ottoman legal and social order, and how the Ottoman ruling elite, via sword and pen, articulated a claim to universal sovereignty that subverted internal challengers and external rivals.

The Business of State: Ottoman finance administration and ruling elites in transitions (1580s-1615). (Studien zur Sprache, Geschichte und Kultur der Turkvölker 28) 402p Berlin 2018

9783879974771 16,100

Based on original Ottoman sources, the author traces the transformation of the financial and administrative system of the Ottoman Empire at the turn of the 17th century. The changes were made necessary by the burgeoning budget deficit, a consequence of overspending by the oversized Ottoman state. The author proves that the phenomena previously thought to be signs of decline were in fact aspects of a well-considered reform program, dismantling step by step the centralized redistributive system.

The book offers a balanced and realistic picture of the coexistence of different peoples and cultures in Ottoman Hungary. It refrains both from repeating the commonplaces of the sixteenth century antiturcica literature and from sharing the overtly positive Ottoman-image of the early modern age.

Childhood in the Late Ottoman Empire and After. (The Ottoman Empire and its Heritage, 59) xviii,285p Leiden 2015 9789004293120 19,250

This volume explores the variety of ways in which childhood was experienced, lived and remembered in the late Ottoman Empire and its successor states. The period of the late nineteenth and early twentieth

centuries was a time of rapid change, and the history of childhood reflects the impact of new expectations, lived realities and national responsibilities on the youngest members of societies undergoing monumental change because of ideological, wartime and demographic shifts.

The Şikayet Defteri is a legal document because many of the complaints stem from the point of departure that a certain Shari'a law has been broken, violating the natural rights of certain groups of citizens. More important than this, however, the Şikayet is a legal document from an additional, methodological perspective: the document provides a perspective on the Kadi, his court, and his position in the state, which are unlikely to be obtained from any other source.

Particularly, such information cannot be had from the Kadi record (sicill) itself, as this source only looks at itself from the inside, solving day-to-day problems.

614p Berlin 2018 9783879974672 17,150
This book is the shortened and revised version of the
authors' volume "Fortresses and Fortress Garrisons in
Ottoman Hungary I-III", published in Hungarian by the
Institute of History, Hungarian Academy of Sciences
(Budapest, 2007). This revised version contains
considerable alterations in order to suit better for the
needs of non-Hungarian readers. However, the book
maintains the original structure: the first part is a
monograph about the Ottoman border defense system

and its garrison troops, the second part is a data collection concerning Ottoman fortresses. This collection is based on a wide range of sources like Ottoman pay lists (mevacib defterleri) that are kept in archives of Vienna, Istanbul, Berlin, Budapest etc., records of the treasury house that contain pay accounts (hazine defterleri), estate records (icmal defterleri) and tax censuses (mufassal defterleri).

Nation-Building in Modern Turkey: the 'People's House', in the state and the citizen. 320p London 2018 9781788313940 pap 4,950

From 1924 to 1946 the Republic of Turkey was in effect ruled as an authoritarian single-party regime. During these years the state embarked upon an extensive reform programme of modernisation and nation-building. Lamprou here offers an alternative understanding of social change and state-society relations in Turkey, shifting the focus from the state as the prime instigator of change to the population's participation in the process of reform

Religious Politics in Turkey: from the birth of the republic to the AKP. (Cambridge Middle East Studies) 286p Cambridge 2019 9781108472005 15,855

Lord shows how Islamist mobilisation in Turkey has been facilitated from within the state by institutions established during early nation-building. Lord thus

challenges the traditional account of Islamist AKP's rise that sees it either as a grassroots reaction to the authoritarian secularism of the state or as a function of the state's utilisation of religion.

The 18th century brought a period of tumultuous
change to the Ottoman Empire. While the Empire sought
modernisation through military and administrative
reform, it also lost much of its influence on the European
stage through war and revolt. Menchinger sheds light on
intellectual life, politics and reform in the Empire through
the study of one of its leading intellectuals and
statesmen, Ahmed Vasif.

In the 17th century, the elite household (kapı) became the focal point of Ottoman elite politics and socialization. It was a cultural melting pot, bringing together individuals of varied backgrounds through empire-wide patronage networks. This book investigates the layers of kapı power through the example of Şeyhülislam Feyzullah Efendi, who occupied the highest position in the legal-academic establishment between 1695- and 1703.

 Following the so called "Arab Spring" the world's
 attention has been drawn to the presence of significant
 minority religious groups within the predominantly
 Islamic Middle East. Of these minorities Christians are by
 far the largest, comprising over 10% of the population in
 Syria and as much as 40% in Lebanon. The largest single
 group of Christians are the Arabic-speaking Orthodox.
 This work fills a gap in the scholarship of wider Christian
 history and more specifically that of lived religion within
 the Ottoman empire

Sariyannis offers a survey of Ottoman political texts, examined in a book-length study for the first time. From the last glimpses of ghaza ideology and the first instances of Persian political philosophy in the fifteenth century till the apologists of Western-style military reform in the early nineteenth century, the author studies a multitude of theories and views, focusing on an identification of ideological trends rather than a simple enumeration of texts and authors.

The Formation of Turkish Republicanism. 320p

Princeton 2017 9780691172743 6,032

Turkish republicanism is commonly thought to have originated with Mustafa Kemal Atatürk and the founding of modern Turkey in 1923, and understood exclusively in terms of Kemalist ideals, characterized by the principles of secularism, nationalism, statism, and populism. Banu Turnaoğlu challenges this view, showing how Turkish republicanism represents the outcome of centuries of intellectual dispute in Turkey over Islamic and liberal conceptions of republicanism, culminating in the victory of Kemalism in the republic's formative period.
