The Return of the Taliban: Afghanistan after the Americans**Left.** 352p. New Haven, 2024, 9780300278712, Yale U.P. (43793) Pap 3,780

[Since the fall of Kabul in 2021, the Taliban have effective control of Afghanistan—a scenario few Western commentators anticipated. But after a twenty-year-long bitter war against the Republic of Afghanistan, reestablishing control is a complex procedure. What is the Taliban’s strategy now that they’ve returned to power?

In this groundbreaking new account, Hassan Abbas examines the resurgent Taliban as ruptures between moderates and the hardliners in power continue to widen. The group is now facing debilitating threats—from humanitarian crises to the Islamic State in Khorasan—but also engaging on the world stage, particularly with China and central Asian states. Making considered use of sources and contacts in the region, and offering profiles of major Taliban leaders, Return of the Taliban is the essential account of the movement as it develops and consolidates its grasp on Afghanistan.]

[The Caspian World is a wide-ranging exploration of the
strategic, political, and commercial significance of the Caspian
Sea, a site where empires—Russian, Persian, Ottoman, and
British—competed, warred, and collaborated. As with the
Mediterranean, the Indian Ocean, or the Black Sea, the
geography of the Caspian Sea creates a sphere of unique
political dynamics and possibilities, and the essays in this
volume describe the role of the Caspian as a force of
connection, as well as a source of threats, to the states on its
shores.]

[How did the Tocharians reach China? Who did they meet on
the way?" are some of the most intriguing questions in
Indo-European studies. This book is zooming in on a specific
part of the question: on their way to China, Tocharians were
in contact with an Iranian people living in the south Siberian
Steppes, and with a people related to the Oxus Civilization
(BMAC).]

[Intellectuals, Merchants -- Mongolia -- 13-14th century --
Biography -- History

During the thirteenth and fourteenth centuries, Chinggis Khan
and his heirs established the largest contiguous empire in the
history of the world, extending from Korea to Hungary and
from Iraq, Tibet, and Burma to Siberia. Ruling over roughly
two thirds of the Old World, the Mongol Empire enabled
people, ideas, and objects to traverse immense geographical
and cultural boundaries. Along the Silk Roads in Mongol
Eurasia reveals the individual stories of three key groups of
people—military commanders, merchants, and
intellectuals—from across Eurasia. These annotated
biographies bring to the fore a compelling picture of the
Mongol Empire from a wide range of historical sources in
multiple languages, providing important insights into a period
unique for its rapid and far-reaching transformations.]

[Mongol --Iran -- Islam -- Buddhists -- History

In the Mongol Empire, the interfaith court debate was an arena for an ideologically and religiously charged performance of the Mongol ruler's sacred kingship. At the court of the newly established Ilkhanate, Muslim administrators, Buddhist monks, and Christian clergy all attempted to sway their imperial overlords, arguing fiercely over the proper role of the king and his government, with momentous and far-reaching consequences. Focusing on the famous but understudied figure of the grand vizier Rashid al-Din, a Persian Jew who converted to Islam, Jonathan Z. Brack explores the myriad ways Rashid al-Din and his fellow courtiers investigated, reformulated, and transformed long-standing ideas of authority and power.]

[This volume historically investigates the Old Uigur administrative orders of compulsory requisitions (including those in tax receipt format) among the Berlin, London, St. Petersburg, Kyoto, Istanbul, and Chinese collections, 107 in total. These documents are concerned with taxation, tribute, and compulsory labor service systems of the West Uigur kingdom in the Turfan region from the 9th to the 14th centuries. The majority of the documents belong to the 13th and 14th centuries, and therefore the historical analysis in this volume concentrates mainly on the Turfan Uigur society under the rule of the Mongol empire. The findings of the present volume will merit a further comparative analysis of the Eurasian-wide synchronicity of the taxation and labor service systems under Mongol rule and can be positioned in the historical development of the Turfan region and Central Asia through comparison with chronologically and linguistically diverse textual materials unearthed from the Turfan basin and surrounding Central Asia.] 6440

[In this comprehensive and up to date history, from prehistoric proto-Indo-Iranian times to the post-Soviet period, Richard Foltz traces the complex linguistic, cultural and political history of the Tajiks, a Persian-speaking Iranian ethnic group from the modern-day Central Asian states of Tajikistan, Afghanistan, and Uzbekistan. In eight chapters, the author explores the revitalisation of Persian culture under the Samanid Empire in the Tajik heartlands of historical Khorasan and Transoxiana; analyses the evolution of the politics of Tajik identity; and traces the history of the ethnic Tajik diaspora today.]

[The book "Gulag Miracles: Sufis and Stalinist Repression in Kazakhstan", represents the first detailed study of Muslim religious responses to totalitarian repression during the first half of the 20th century, and is therefore of interest to specialists in Islamic Studies, Religious Studies, Russian and Soviet History, Central Asian and Turkic Studies, and Sufi Studies. Based on Kazakh-language hagiographies produced by Sufi communities, the monograph examines how these communities interpreted and explained the experience of repression (anti-religious policies targeting Sufis, collectivization, famine, and mass arrests), and how these communities adjusted to Soviet life after the Second World War.]

[The city of Herat in western Afghanistan long sat at the edge of empires and served as a hub for trade and a conduit for armies. Yet it has been much more than simply a staging post or plaything of political ambition. It has been an imperial capital, a city of extraordinary wealth, and has played host to a cultural renaissance to rival that of Florence. The Pearl of Khorasan tells the history of this storied oasis city, from the invasions of Chingiz Khan in 1221 to the present day. An epilogue assesses the challenges Herat faces in the wake of Afghanistan's recent turmoil.]

[Silk Road -- Central Asia -- Textiles -- Trade routes -- History In 'Transcending Patterns: Silk Road Cultural and Artistic Interactions through Central Asian Textiles', Mariachiara Gasparini investigates the origin and effects of a textile-mediated visual culture that developed at the heart of the Silk Road between the seventh and fourteenth centuries. Through the analysis of the Turfan Textile Collection in the Museum of Asian Art in Berlin and more than a thousand textiles held in collections worldwide, Gasparini discloses and reconstructs the rich cultural entanglements along the Silk Road, between the coming of Islam and the rise of the Mongol Empire, from the Tarim to Mediterranean Basin. Exploring in detail the iconographic transfer between different agents and different media from Central Asian caves to South Italian churches, the author depicts and describes the movement and exchange of portable objects such as sculpture, wall painting, and silk fragments across the Asian continent and across the ages]

[This book exposes the true factors underpinning Kabul's fall. The Afghan Republic came under relentless attack from Taliban insurgents who depended critically on Pakistani support. It also suffered a creeping invasion that put the government on the back foot as the US tried and failed to deal with Pakistan's perfidy. The fatal blow came when bored US leaders naively cut an exit deal with the enemy, fatally compromising the operation of the Afghan army and air force and triggering the final collapse, with top leaders at odds over whether to make a final stand in Kabul.]

Harrassowitz (43243) 18423

[Since the beginning of his rise to power, Chinggis Khan used matrimonial relations between the members of his family and his allies in order to strengthen his support base and to

expand the potential of his army. Whereas research has discussed in detail the history of the Chinggisid women, the role of their male non-Chinggisid counterparts – the imperial sons-in-law (Mon. güregen, Ch. fuma 駙馬), mostly the powerful military commanders – is still an under-researched topic.

In his monograph, Ishayahu Landa for the first time provides a comprehensive and detailed discussion of the Chinggisid in-laws, approaching them as a separate political institution with its own status, privileges, and ambitions, which played a crucial role in underpinning the Mongol rule across the continent. The monograph is unique in its combined usage of Arabic, Persian, Chinese, Latin and Old Slavonic primary sources as well as its temporal scope, ranging from the early thirteenth century to the period of the Chinggisid Crisis and beyond.]

While analysts have focused on the role of leaders such as Vladimir Putin and Recep Tayyip Erdogan in explaining this drive to dominate neighbors and pull away from the Western-dominated international system, they have paid less attention to the role of imperial legacies.0 Jeffrey Mankoff argues that what unites these contemporary Eurasian powers is their status as heirs to vast terrestrial empires, whose collapse left all four states deeply entangled with the lands and peoples along their peripheries but outside their formal borders. Today, they have all found new opportunities to project power within and beyond their borders in patterns shaped by their respective imperial pasts.]

Forging the Golden Urn: the Qing Empire and the politics of reincarnation in Tibet. 352p, N.Y. 2023,

9780231184076, Columbia U.P. (41698) Pap 5292

[In 1995, the People's Republic of China resurrected a

Qing-era law mandating that the reincarnations of prominent Tibetan Buddhist monks be identified by drawing lots from a golden urn. The Chinese Communist Party hoped to limit the ability of the Dalai Lama and the Tibetan government-in-exile to independently identify reincarnations. In so doing, they elevated a long-forgotten ceremony into a controversial symbol of Chinese sovereignty in Tibet.

Working with both the Manchu-language archives of the empire's colonial bureaucracy and the chronicles of Tibetan elites, Oidtmann traces how a Chinese bureaucratic technology—a lottery for assigning administrative posts—was exported to the Tibetan and Mongolian regions of the Qing empire and transformed into a ritual for identifying and authenticating reincarnations.]

[The territory of modern Afghanistan provided a center – and
sometimes the center – for a succession of empires, from the
Achaemenid Persians in the 6th century BCE until the
Sasanian Iranians in the 7th century CE. And yet these regions
most frequently appear as comprising a crossroads in
accounts of their premodern history.

This volume explores how successive imperial regimes
established enduring forms of domination spanning the
highlands of the Hindu Kush, essentially ungovernable
territories in the absence of the technologies of the modern
state. The modern term “Afghanistan” likely has its origins in
an ancient word for highland regions and peoples resistant to
outside rule.]

Covering the broad geographical spectrum spanning from the Bosphorus via Upper Mesopotamia (the jazīra), Iran, Afghanistan and Central Asia to India and the border regions of China, and shedding light on this area from historical, philological, literary and ethnological perspectives, the individual case studies are devoted to studies of urban, local and regional history, various forms of historiography and questions of legitimizing authority. What all contributions have in common is a reference to the research areas and interests of Prof. Jürgen Paul, to whom this volume is dedicated on the occasion of his 70th birthday.]

[Central Asia -- Mongols -- Islamic empire -- History -- To 1500 -- Sources

These three volumes represent some of the most important historical sources for medieval Islamic scholarship. Yet the Persian of the original texts is often extremely difficult, even for accomplished scholars. Distinguished linguist and orientalist Wheeler Thackston here provides lucid, annotated translations that make this key material accessible to a wide range of scholars. Mirzar Haydar's 'Tarikh- i - Rashidi' provides a history of the of the Khans of Moghulistan, the vast stretch of territory between the ancient cities of Central Asia and Mongolia. Khwandamir's The Reign of the Mongol and the Turk covers the major empires and dynasties of the

Persianate world from the 13th to the 16th century, including the conquests of the Mongols, Tamerlane, and the rise of the Safavids. The final volume, written by the grand vizier of the Mongol rulers of Iran, includes a valuable survey of the Turkic and Mongolian peoples, a history of Genghis Khan's ancestors, and a detailed account of his conquests]

[In this comprehensive study Paul Wexler demonstrates that Yiddish is a Slavic language largely relexified to genuine and artificial German and Hebrew, as a cryptic language of trade in the Khazar Empire in the 9–10th centuries for the use of multilingual Jewish merchants, who enjoyed special privileges on the Afro-Eurasian Silk Roads until the 13th century. Other Judaized trade languages (Turkic, Chinese, Arabic) were also coined at this time in the Khazar and Iranian Empires.]

[Central Asia has been perceived as a landscape of connections, of Silk Roads; an endless plain across which waves of conquerors swiftly rode on horseback. In reality the region is highly fragmented and difficult to traverse, and overcoming these obstacles led to routes becoming associated with epic travel and high-value trade. Put simply, the inhabitants of these lands became experts in the art of travelling the margins. This volume seeks to unravel some of the myths of long-distance roads in Central Asia, using a desert case-study to put forward a new hypothesis for how medieval landscapes were controlled and manipulated]

The King's Road: diplomacy and the remaking of the Silk Road. 400p, Princeton, 2023, 9780691237831, Princeton U.P. (41704) 9,441

[Using documents unearthed from the famous Dunhuang "library cave" in Western China, The King's Road paints a detailed picture of the intricate network of trans-Eurasian transportation and communication routes that was established between 850 and 1000 CE. By exploring the motivations of the kings who dispatched envoys along the Silk Road and describing the transformative social and economic effects of their journeys, the book reveals the inner workings of an interstate network distinct from the Sino-centric "tributary" system.]
